

Rock YOUR Socks

March 21, 2024

The SASEAS community would like to join together with others from all around the world who celebrate World Down Syndrome Day *by wearing brightly colored, mismatched socks.*

World Down Syndrome Day is an opportunity to end the stereotypes associated with down syndrome and to celebrate our differences!

Why March 21? People with down syndrome have 3 copies of their 21st chromosome.

Why socks? Chromosomes kinds of look like colorful, patterned socks. Your DNA is what makes you unique!

Why participate? It's our chance to make a change and to help spread awareness, acceptance and inclusion.
